From the moment it begins beating until the moment it stops , the human heart works tirelessly . In an average lifetime , the heart beats more than two and half billion times , without ever pausing to rest . Like a pumping machine , it provides the power needed for life.

The human heart's job is to pump the blood throughout your body . If you smoke , you are giving your heart extra work over a long period of time . Over time , the health of your heart will suffer . Smoking doubles your risk of having a heart attack and double your risk of a sudden death . So don't smoke . The sooner you **quit** , the better you will be.

If you want your heart to be healthy for the rest of your life , follow these pieces of advice : get plenty of exercise , follow a good diet and keep your heart clean. People who don't follow these instructions often suffer from some of heart diseases.
