**VI. COMPREHENSION (20 MARKS)**

**Read the following passage, then answer the questions below:**

Have you ever heard someone use the phrase “once in a blue moon?” People use this expression to describe something that they do not do very often. For example, someone might say that he tries to avoid eating sweets because they are unhealthy, but will eat chocolate “once in a blue moon.” Or someone who does not usually like to go to the beach might say “I visit the shore once in a blue moon.” This is just an expression.

As the moon travels around the earth, it appears to change shape. For example, when we can see a small part of the moon, it is called a crescent. When we cannot see the moon at all, it is called a new moon. When we can see the entire moon, it is called a full moon. Usually, there is only one full moon every month. Sometimes, there will be two full moons in one month. When this happens, the second full moon is called a “blue moon.”
