VI-Reading Comprehension (20 marks)

-Read the following passage carefully, then answer the questions below:

It is hard to imagine how certain products were invented. It turns out many of society's most well-known inventions were simply mistakes made by scientists trying to invent. No one could ever imagine that the flavoured potato chips and the morning best preferred breakfast, corn flakes, were accidentally introduced to the world's kitchen.

Potato chips were first meant to be a plate of fried potato. It was invented by George Crum, a chef at the Carey Moon Lake House. How was it created? One day a customer sent back his plate of potatoes many times and kept asking for them to be more fried and thinner. Crum lost his temper, sliced the potatoes **extremely** thin and fried them until they were hard as a rock. To the chef's surprise, the customer loved them and wanted more!

Corn flakes were invented by the Kellogg brothers, John and Will. They were trying to make pots of boiled grain. How was it created? The brothers accidentally left a pot of grain on the stove for several days. The mixture turned bad but there was something that was dry and thick. Through experimentation **they** removed the bad part and created corn flakes. Wouldn't it be nice if you could invent something by mistake?
