**Read the following passage then answer the questions below:**

Once, a giant ship engine failed. The ship's owners tried one expert after another, but none of them could know how to fix the engine. After a long time, they brought in an old man who had been fixing ships since he was a young boy. He was very experienced in mending ships. He carried a large bag of tools with him, and when he arrived, he immediately went to work. He inspected the engine very carefully, top to bottom.

Two of the ship's owners were there, watching this man carefully, hoping he would know what to do. After looking things over, the old man reached into his bag and pulled out a small hammer. He gently hit the engine several times with it. Instantly, the engine started to work again. He carefully put his hammer in his bag . The two owners were very happy. The engine was fixed!

A week later, the owners received a bill from the old man for ten thousand dollars. "What?!" the owners wondered. "He hardly did anything!" So they wrote the old man a note saying, "Please send us an itemized bill." The man sent a bill that read: "Hitting with a hammer costs \$ 2.00 - Knowing where to hit costs \$ 9,998.00 . Effort is important, but knowing where to make an effort makes all the difference!."
