## VI. Reading Comprehension:( 20 marks )

Read the following passage, then do as required below:

I have an unusual pet and an unusual problem. Suzy is my pet chameleon. I keep it in a big glass tank with lots of plants, rocks, and a little pond. I regularly provide insects, which she catches by shooting her sticky tongue. Each of her eyes moves separately, and when she sees a meal she catches it and rolls her long tongue back faster than I can see it. She's a great pet and has a luxury glass tank for a home but the problem is that she seems to prefer my room.

Suzy takes every chance she gets to escape into my room and run away from her tank. You would think it would be easy to a bright green lizard among my things. But, chameleons can change their colour to hide. Suzy can change colour and hides on the curtains, rug and bedspread. Eventually she comes back to her glass tank, but I worry that she may be out and about and I might sit on her or something.

To solve this problem, I read a book about lizards. I found something that just might work the next time she decides to hide in my room. I read that chameleons react to changes in light and, if angry they turn black! Perhaps if I suddenly shine a bright flashlight around the room, she will show herself.
